

MResult Attains ISO 27001:2005 Certification

NEW LONDON, May, 2008 – MResult is pleased to announce that it has received International Organization for Standardization's (ISO) 27001:2005 security management systems certification for its operations in India. By receiving this certification, MResult is internationally acknowledged to provide a consistent organizational approach to information security.

ISO is best known for its development of standards that provide requirements or give guidance on good management practice. Of these standards, the ISO 27001:2005 for security management systems defines best practices for establishing and maintaining effective information management systems, using a continual improvement approach. It implements OECD (Organization for Economic Cooperation and Development) principles governing security of information and network systems. MResult's certification is accredited by the ANSI-ASQ National Accreditation Board (ANAB) and the United Kingdom Accreditation Service (UKAS).

"MResult is pleased and excited to receive ISO 27001:2005 certification. It is a standard that is respected and recognized throughout the world. This certification demonstrates our unwavering commitment to information security," said Mohan Naik, President, MResult India. "Certified compliance with voluntary ISO certification procedures assures MResult customers that all of our products and services adhere to ISO's documented processes and procedures. This ensures that our customers will be provided with continuous improvements."

ABOUT ISO

ISO (International Organization for Standardization) is the world's largest developer and publisher of International Standards. ISO began operations in 1947. ISO is a network of the national standards institutes of more than 150 countries, with a Central Secretariat in Geneva, Switzerland, that coordinates the system.

ISO standards are voluntary. As a non-governmental organization, ISO does not regulate or legislate. However, countries may decide to adopt ISO standards as regulations or refer to them in legislation. ISO standards are often used as a market requirement.
