

# MResult Clinical Monitor Manager

## Forecast, Plan and Manage Your Clinical Monitoring Process

MResult's Clinical Monitoring Management (CMM) provides new and unique functionality to augment or complement traditional Clinical Trial Management Systems. CMM provides clinical trial sponsors with enhanced capabilities to manage all aspects of the clinical monitoring process - forecast, plan, recruit, assign, schedule, and track your clinical monitoring process with ease. CMM also features flexible reporting features, customized for your needs.

## Efficiency

**Monitor Scheduling:** Manage monitors, visit planning, and develop advance and real-time monitor schedules based on protocol monitoring plan and SOPs.

**Criteria based Assignment:** Assign monitors to clinical trials based on criteria such as skill set and availability.

**Automate Study and Site data:** Automate data feeds to source trial related data (study, site) from sponsors.

## Quality

**Compliance Reports and Alerts:** Zone managers can access compliance reports and alerts to ensure adherence to monitor scheduling.

**Status Tracking and Compliance:** Monitoring dashboards provide various management views to assist with the planning, conduct, and close-out of studies

## Service

**Forecasting Tools:** User-friendly applications for planning and forecasting monitor capacity.

**Customizable Features:** Reporting features may be tailored to provide specific flags or alerts for recruiting, resources, and risk.

**Hosted Delivery:** Access to software through MResult hosted model means easy setup and customization for client-specific requirements.
