### **MResult Attains ISO 9001:2000 Certification**

**NEW LONDON**, November 21, 2007 – MResult is pleased to announce that it has received International Organization for Standardization's (ISO) 9001:2000 quality management systems certification for its operations in India. By receiving the ISO 9001:2000 quality management systems certification, MResult is internationally acknowledged to provide a documented, consistent high level of standards in its product and services development processes.

ISO is best known for its development of standards that provide requirements or give guidance on good management practice. Of these standards, the ISO 9001:2000 for quality management is an internationally recognized reference for ensuring the highest possible quality in business-to-business dealings. MResult's certification is accredited by the ANSI-ASQ National Accreditation Board (ANAB) and the United Kingdom Accreditation Service (UKAS).

"MResult is pleased and excited to receive ISO 9001:2000 certification. It is a standard that is respected and recognized throughout the world. This certification demonstrates our unwavering commitment to quality," said Mohan Naik, President, MResult India. "Certified compliance with voluntary ISO certification procedures assures MResult customers that all of our products and services adhere to ISO's documented processes and procedures. This ensures that our customers will be provided with continuous improvements."

To become certified as ISO 9001:2000 compliant, MResult underwent an eight-month evaluation process that included quality management system development, a management system documentation review, pre-audit, initial assessment, and clearance of non-conformances; all of which worked to identify corrective actions that elimination non-conformance to the quality management standard.

## **ABOUT ISO**

ISO (International Organization for Standardization) is the world's largest developer and publisher of International Standards. ISO began operations in 1947. ISO is a network of the national standards institutes of more than 150 countries, with a Central Secretariat in Geneva, Switzerland, that coordinates the system.

ISO standards are voluntary. As a non-governmental organization, ISO does not regulate or legislate. However, countries may decide to adopt ISO standards as regulations or refer to them in legislation. ISO standards are often used as a market requirement.

## **ABOUT MRESULT**

MResult Corporation was founded in 2002 by Sekhar Naik in order to provide best practices solutions in software development, business analysis and quality assurance. Many of their clients include Fortune 500 companies and internationally renowned high-growth companies. MResult offers a full range of business intelligence, portal development, and product and applications research & development.
